Entrance and sliding gates

Controlled vehicle access for industrial and perimeter openings.

Sliding entrance gates for perimeters, yards and industrial sites, cantilevered or tracked, manual or automatic. Most are built to the opening, with the size, height, infill, finish and controls set for the project.

SAFETY	ALSO TO	TYPE	OPERATION
EN 12453	UL 325	Cantilever	Automatic
Power-operated gates	And ASTM F2200	Or tracked	Or manual

Benefits

- **Built to your opening.** Size, height, infill and finish.
- **Cantilevered or tracked.** To suit the ground.
- **Proven drive units.** Motor-gearbox with modern controls.
- **Works with access control.** Loops, photocells, ANPR, push-button.
- **Safe in use.** Alarms, beacons and safety edges.
- **Security toppings.** Rotor spikes or barbed wire.

Options

Cantilevered or tracked · Manual or automatic · Insulated infill panels · Reader posts · Security toppings

Technical data

ITEM	SPECIFICATION
Type	Heavy-duty sliding entrance gate
Configuration	Cantilevered or tracked
Operation	Manual or automatic
Frame	Substantial steel hollow sections
Running gear	Industrial rollers, top guide, catcher, stopper
Drive	Motor-gearbox drive, modern control electronics
Access control	Photocells, induction loops, ANPR, push-button
Safety	Audible alarms and flashing beacons
Standards	EN 12453 · ASTM F2200 · UL 325
Finish	Two-coat paint treatment

Where it is used

Government and ministry buildings · Embassies and consulates · Military gates and checkpoints · Airports and seaports · Oil and gas sites · Power plants and substations · Stadiums and arenas · Banks and corporate campuses · Industrial and logistics yards · Data centres · Public squares and pedestrian zones · Critical infrastructure

Confirm the complete configuration. Performance, sizes and options are confirmed for each project. Send us the specification and drawings and we will confirm the proposed product and its supporting documents.

Send us your drawings and specification.
